Career Summary

- Built a scalable marketplace platform with Next.js, Redux, and Redux Persist, delivering seamless product browsing, cart management, and order tracking for improved user experience.
- Developed role-based admin and user dashboards for streamlined product management, order tracking, and user reviews, driving operational efficiency and customer engagement.
- Engineered responsive full-stack web applications using React, Redux, Node.js, and MongoDB, focusing on clean, maintainable code and efficient architecture.
- Expert in designing RESTful APIs with secure authentication, payment integration, and real-time booking.
- Experienced in building user-friendly admin and user dashboards for managing services and bookings.

Skills

- ❖ **Expertise:** React.js, Next.js, Redux, Redux-Toolkit, RTK Query, Node.js, Express.js, Mongoose, MongoDB, JavaScript, Tailwind CSS, React Router
- ❖ **Comfortable:** Typescript, Material UI, Rest API, Firebase, Ant Design, PostgreSQL
- ❖ **Familiar:** React Native, Styled Components, SASS, Python, C/C++
- ❖ **Tools:** Git, VS Code, Chrome Dev, Vercel, Railway, Supabase, Heroku, Netlify, Firebase, Figma
- ❖ **Soft Skills:** Hard working, Quick Learner, Active Listening, Responsibility, Management.

Projects

Electronic Gadget Hub | [Website](#) | [Github Repository](#)

- An electronic gadgets marketplace with an intuitive UI/UX, leveraging Next.js and Redux for a seamless user experience.
- Implemented user authentication, dynamic product management, and cart functionality with Redux Persist for the persistent shopping experience.
- Created comprehensive dashboards for admins to manage products and orders, and for users to view and review their orders.

Technology: Next.js NextUI, Redux, TypeScript, Node.js, Express.js, Mongoose, MongoDB

Car Wash Booking System | [Website](#) | [Github Repository](#)

- Customers can explore, filter, and book available services with a user-friendly interface, including secure payment integration via AAMARPAY.
- Admin can efficiently manage services, slots, and user bookings, ensuring smooth operations and scheduling.
- Includes a responsive design, dark mode, review system, and personalized dashboards for both users and administrators

Technology: React, Redux, TypeScript, Node.js, Express.js, Mongoose, MongoDB

Mobile Shop | [Website](#) | [Client](#) | [Backend](#)

- Built a full-stack e-commerce platform for mobile phones with React, Tailwind CSS, and Firebase, featuring user authentication and secure Stripe payments.
- Integrated React Query for data fetching and React Hook Form for form handling, ensuring a seamless user experience.
- Developed admin functionalities for managing inventory, updating phone listings, and user roles.
- Implemented admin tools for monitoring revenue and order details.

Technology: React, Firebase, Tanstack Query, Axios, Stripe, Node, Express, JWT, MongoDB.

Education

Govt. Madrasah-e-Alia, Dhaka

Fazil Honors 2nd Year in Al-Quran and Islamic Studies
